

Grit Master *Blue*

Industrial Grade Hand Cleaner

PRODUCT DESCRIPTION

Grit Master *Blue* is an industrial strength hand cleaner capable of quickly removing common occupational soils encountered in automotive and industrial workplaces. The formulation includes specially selected scrubbing agents to speed soil removal without being aggressive to skin.

Grit Master *Blue* is formulated to remove common grease and oil stains from skin and leave the skin feeling clean and smooth.

FEATURES & BENEFITS

- Rapidly dissolves and removes ingrained grime, grease, tar oil, carbon, shoe polish, asphalt, printing inks, rubber compounds, fruit and wood sap stains, paint, adhesives and similar occupational soils.
- Superior cleaning without the use of irritating smelly petroleum-based solvents or harsh alkalis. Tough on soils, gentle on the skin.
- Degreases and removes soils and grease without defatting the skin.
- Contains skin softeners, exhibits a luxurious cosmetic feel leaving hard working hands soft and supple. Will not irritate, chap or roughen normal healthy skin.
- Clean citrus fragrance leaves hands smelling fresh and hygienic.
- Rinses freely after cleaning, does not leave a sticky, tacky feeling after drying. If water is not available, just wipe off with paper towel or cloth.

PROPERTIES

Appearance:	Opaque viscous liquid

Industrial Cleaning Solutions from Ecolab

Grit Master *Blue*

Industrial Grade Hand Cleaner

TO USE

Grit Master *Blue* is applied to hands without the need to dilute with water. Rub hands together well to ensure complete product coverage and allow it to penetrate even the most stubborn of grease and oil stains.

The product should then be rinsed off with water to leave hands and skin clean.

Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment.

SAFETY DIRECTIONS

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.
